

Getting equipment that is right for you

Remap is a charity that helps disabled people to be as independent as possible.

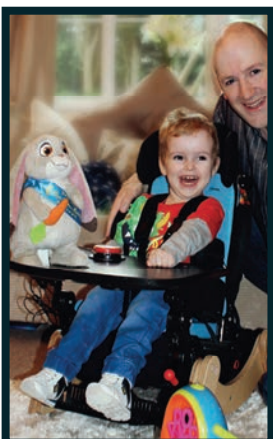

Having the right equipment is a really important part of this.

We design and make special equipment that disabled people need.

We make these things for free.

This is a picture of Ethan.

We built this chair for him so he can reach his toys and play on his own. We make equipment that helps someone fix a problem.

Everyone is different and often people cannot get the special equipment they need from regular shops.

Lots of people ask us to make them equipment every year.

Our skilled **volunteers** work hard to meet everyone's needs.

A **volunteer** is someone who gives up their time to help other people for free.
